In my opinion it is time to drop all complaints against Microsoft. The Microsoft Company has done more to increase productivity and efficiency in the American workforce than any other single entity in the entire history of the United States. The entire case against Microsoft by a group of mis-guided Attorneys General and competitors who lacked quality products signifies one very important fact to me: if you can't beat the competition find a lawyer who will do his darndest to sue. I don't think that is the American way. Our world dominance in computer software is due to the excellent foresight and long term strategic planning of Microsoft. Any and all legal action against the Microsoft Corp. should be immediately terminated.
